Art Unit: 1714

Claim 28 provides for the use of an aqueous dispersion, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 28 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1- 28 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Eisenhart et al, US Patent No. 5,266,646 or Messner et al, US Patent No. 5,480,934.

3. Applicant's compounds are clearly disclosed by the references. Each reference discloses aqueous dispersions of polymer particles wherein said particles are prepared from components which are essentially the same as those components of applicant's claims. The components are also employed at weight ratios which directly correspond to those required by applicant's claims. No patentable difference is readily ascertained. See the claims of each reference. See col. 2, line 50 through col. 11, line 54 of Eisenhart et al. See col. 2, line 40 through col. 9, line 55 of Messner et al.
